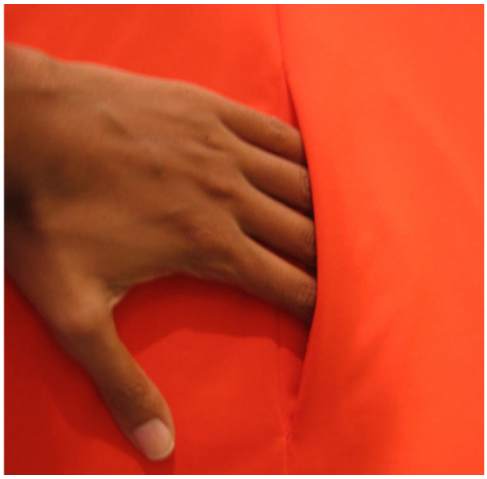
Sew In-seam Pockets

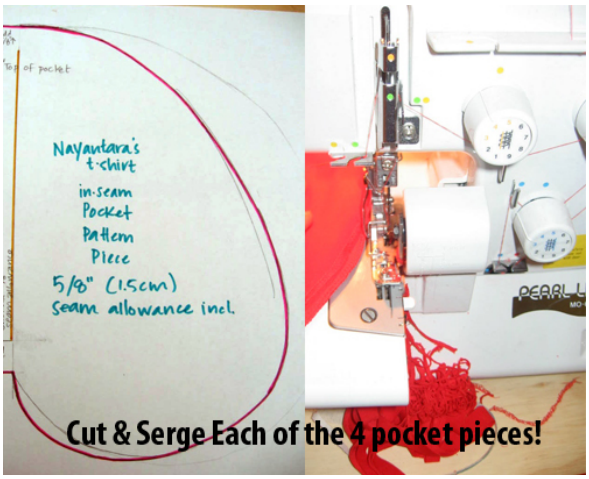
By: BurdaStyle

http://www.burdastyle.com/techniques/sew-in-seam-pockets



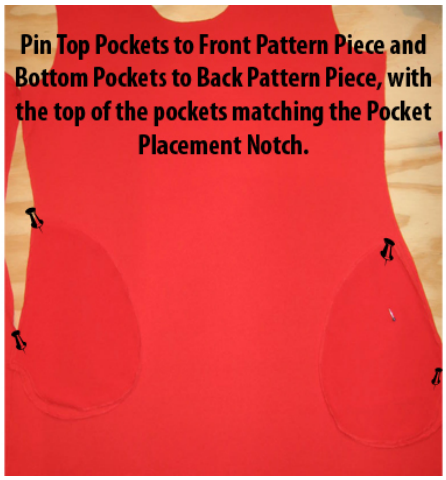
Add inseam pockets to any and every creation you make!

Step 1



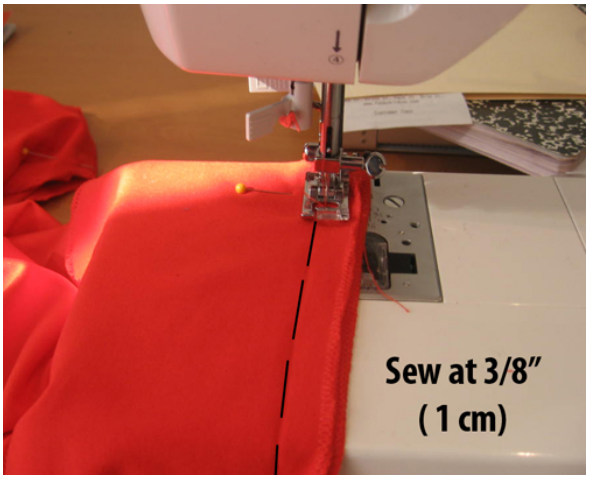
After following the instructions in [the in-seam pocket pattern making How To](), cut out 4 of your pocket pattern pieces and surge around the edges.

Step 2



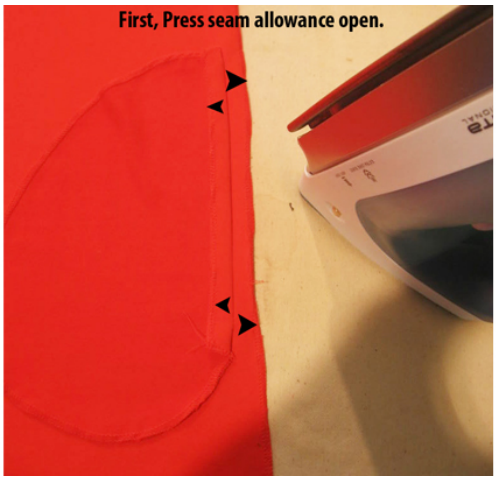
Assign 2 coordinating pocket pieces for each side. Pin a pocket piece onto each side of the front piece, with right sides facing, and onto the back piece.

Step 3



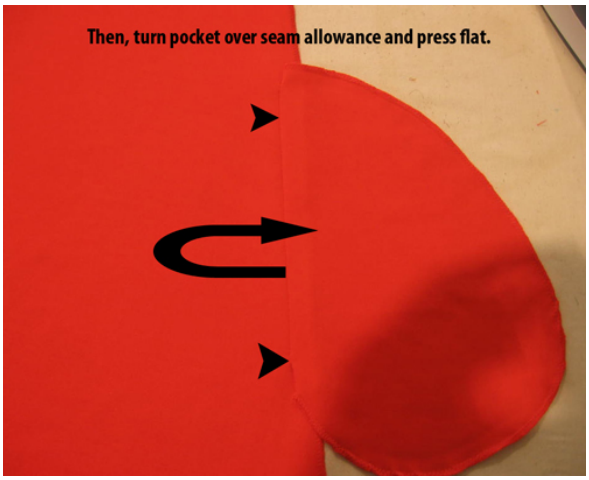
Sew along the length of the **pocket opening** at 3/8" (1 cm)- leaving 5/8" (1.5 cm) unsewn at top and bottom.

Step 4



Press open the seam allowance of each pocket.

Step 5



Turn pocket over the seam allowance so right side is up and press again. Do this for each pocket.

Step 6

Put front and back pieces on top of each other with right sides facing, and pockets on top of one another. Pin along entire side seam as shown.

Step 7

This is how you should pin around the pocket.

Step 8

Sew in one long process along the entire side seam, following the shape around the pocket area.

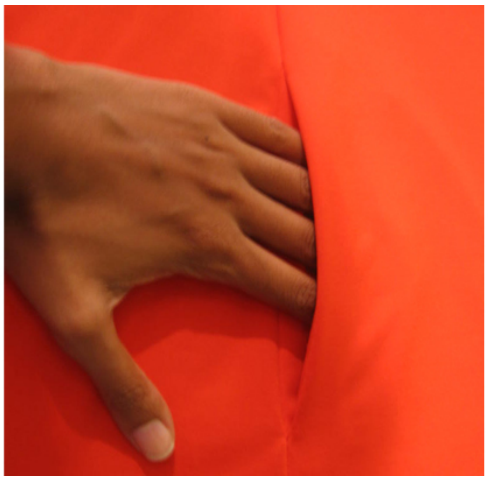
Step 9

To press the pocket and side seams, make a clip in the back seam allowance at the top and bottom of the pockets.

Step 10

Press seam allowance below and above the pockets flat.

Step 11



Now you've got a smooth, barely visible but immensely useful, inseam pocket!
